

## **Conditions In Which Children For Sex Are Found**

“Our team of child rescuers is compiled of former military personnel. Most hardened by the terrors of war, yet fall to their knees in tears upon witnessing the deplorable conditions in which these children, in one case as young as 3, are imprisoned. How is it possible that human beings are capable of fastening children’s wrist to a length of cable attached to a wall with a single blanket on a cot, surrounded by a floor covered with their own urine and feces? In some cases the children are found with unattended and infected cuts and broken limbs. Many of the children are in need of correctional vaginal and anal surgical repair. Most are addicted to heroine or morphine, leaving them with hollowed emptiness in their eyes. If the children are not rescued, eventually the traffickers can no longer use them in child pornography due to their deteriorating appearance. Then they are either sold to whore houses or put to death in snuff films. It is as if Satan himself choreographed the hideous actions of the children’s captors.”
